### ***Information Disclosure Statement***

1. The information disclosure statement filed 4/22/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Essentially, other documents indicated as not considered were neither provided nor apparent in cited parent file.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-68 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-42 of U.S. Patent No. 6729961. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to an artisan at a time prior to the invention to claim the gaming device

Art Unit: 3714

used to play the game/method claimed by Millerschone '961 so as to protect form of gaming device used. Also, the language 'when the player's designation is consistent with predetermined designation associated with first playing symbols, displaying ... at least one first playing symbol and providing predetermined game outcome' is conventional predetermined outcome/interactive game machine play. Morris (5234035) is cited only as evidence of known predetermined gaming system programmed to play interactive game/method.

4. Claims 1-68 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-96 of copending Application No. 10/846448 (pub no. 2004/0214625). Although the conflicting claims are not identical, they are not patentably distinct from each other because displaying plurality of playing symbols associated with predetermined outcome of '448 is displaying the final hand that includes displaying second playing symbol associated with at least one of the first playing symbols as claimed by Millerschone '578.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 1-68 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-104 of copending Application No. 10/864784 (pub no. 2004/0237118). Although the conflicting claims are not identical, they are not patentably distinct from each other because predetermined designation of '578 implicitly includes a hold or replace designation as claimed by Millerschone '784 for draw poker game .

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
